

**Future Lake Access Note** (Shown as Note #5a - #5b on 2020 Land Use Map)

*Bringing back the lake to downtown Muskego was a large topic during the formulation of this Plan. At this point of time, there is no direct access or views to Little Muskego Lake from the downtown and Janesville Road. This Plan looks to promote increased lake access and view sheds to the lake in two different areas.*

*The first area is located along Lannon Drive, just north of Janesville Road (5a on the map). Connecting lake access to a future development in the former Parkland Mall property is encouraged in this area. The second opportunity is on the east side of the Little Muskego Lake dam along Janesville Court on the southern end of the lake off of Janesville Road (5b on the map). A larger property exists to the east of the dam that has the possibility to be incorporated with other properties in this area to create a large lake access and view shed along the heavily traveled Janesville Road.*

*Recommendations of this DDA include that future decision making bodies be sensitive to how these lake accesses are developed in order to assure that the access points work well with the surrounding land uses. Parcels should be looked to be purchased by the community as funds become available, development takes place, and/or properties go up for sale.*

*Future lake accesses and view sheds will hopefully bring the lake back into the community and create new opportunities for residents and visitors to enjoy an original amenity that Muskego has for so long been based upon.*
